

# Underwater Pace Clock & Lap Counter

Finis Tech Sheet

*Waterproof digital clock for competition and practice settings.*

## Technical Specs:

- ✚ Large easy-to-read 12" x 12" display
- ✚ Completely submersible to depths of 16 feet (5 meters)
- ✚ Includes detachable infrared pole for coaches and meet settings (30" in length)
- ✚ Integrated flip-down stand for placement on deck or below the water
- ✚ Suction cup attachments included for sticking on pool walls
- ✚ Durable Lexan plastic body easily withstands hard impacts from flip-turns or finishes
- ✚ Uses a standard 9-volt battery for 240 hours of operation

## Interface:

- ✚ LCD digits allow for easy reading from multiple angles and varying distances
- ✚ Easy to access buttons on front of clock reset and switch between various modes
- ✚ Buttons on top of detachable pole utilize infrared technology to transmit signals to base unit in order to count, reset and change modes
- ✚ Impact sensor on face of clock counts laps and displays time

## Modes:

### 1. Pace Clock Mode:

- ✚ Two digital numbers continually count seconds from 00-59. Hold down left button to reset back to 00. Seconds will only begin to count upon release. Hold down right button to switch between modes. Clock will continue to run, even while toggling between modes.
- ✚ Hitting the face of clock in this mode does NOT stop time, but merely displays the time (in seconds) that the swimmer touched the clock. This time is displayed for 5 seconds before returning to the current running time.

### 2. Lap Counter Mode:

- ✚ Two digital numbers display the current lap (can display all numbers 00-99). Press right button to count up and left button to count down. Hold down left button to return to 00.
- ✚ Hitting the face of the clock in this mode will increase the lap count by one.
